

Harshal Arun Jaware

Software Developer

PROFILE SUMMARY

Results-driven Software Developer with 8+ years of professional experience building scalable web applications and enterprise software solutions using Node.js, React.js, JavaScript, PostgreSQL, and REST APIs. Experienced in full-stack development, backend API design, third-party API integrations, database optimization, and engineering software development.

Currently working as a **Software Developer 2** at **Eiris Innovation India Pvt. Ltd.**, contributing to engineering applications in the **electrical engineering domain**, including structural analysis and power-system simulation. Strong experience translating business and engineering requirements into reliable, maintainable, and user-focused software solutions.

EDUCATION

2017	MCA North Maharashtra University (NMU)
2014	BCA North Maharashtra University (NMU)
2011	XIIth English
2009	Xth Marathi

WORK EXPERIENCE

Dec 2021 - Nov 2025	Software Developer Tagrem India Pvt. Ltd Tech Stack: Nodejs, React.js, PostgreSQL, HTML, CSS, Google Maps API Project: On-The-Go Transportation Platform - Developed and maintained a ride-booking platform integrating Uber & Lyft APIs for real-time fare estimation and trip scheduling. - Built responsive front-end interfaces with React.js and optimized backend logic using NodeJs. - Integrated Google Maps API for location selection and route tracking. - Designed modules for Broker, Partner, Client, Provider, Invoices, and Vouchers. - Implemented webhook-based ride lifecycle management and improved query performance in PostgreSQL. - Collaborated in an Agile setup to deliver scalable, secure, and high-performance releases.
Aug 2020 - Dec 2021	Software Developer Quality Horizon Pvt. Ltd.

PERSONAL INFORMATION

-  Email
jawareharshal93@gmail.com
-  Mobile
(+91) 9860451556
-  Total work experience
8 Years 8 Months
-  Social Link
<https://www.linkedin.com/in/harshal-jaware-7714b4135/>

KEY SKILLS

React.js

Javascript

Postgresql

Node.js

Azure DevOps

TypeScript

Terraform

OTHER PERSONAL DETAILS

City Pune

Country INDIA

HOBBIES

Playing Piano, Tabla, Bhajans — Regularly engage in devotional singing both solo and in group settings blending spirituality with musical expression.

LANGUAGES

- English
- Hindi
- Marathi

Mar 2019 - Aug 2020

Tech Stack: NodeJs, React.js, MySQL, HTML, CSS
Project: Custom ERP System — UAE Business Management Platform

- Designed and developed ERP modules for HR, Accounting, Sales, Purchase, and Inventory.
- Created reusable React components and optimized MySQL queries for performance.
- Built RESTful APIs using NodeJs and ExpressJs.
- Actively participated in code reviews, debugging, and CI/CD pipeline integration.
- Enhanced user experience with responsive front-end design and improved data flow between modules.

Senior Software Developer

Knoxed Infotech

Tech Stack: NodeJs, JavaScript, ReactJs, MySQL, HTML, CSS
Project: Custom Task Management System (TMS) with Slack Integration

- Designed and developed a task management platform inspired by Jira, enabling real-time tracking and collaboration.
- Integrated Slack API for notifications and real-time task updates.
- Led the development of modular NodeJs architecture with a responsive interface.
- Improved system scalability and optimized query execution for better load handling.

Dec 2017 - Feb 2019

Software Developer

Vedika Web Solutions

Tech Stack: NodeJs, ReactJs, Javascript, ExpressJs, MySQL, HTML, CSS

- Delivered 5+ projects across domains like CRM, finance, and e-commerce.
- Integrated third-party platforms such as Zoho CRM, QuickBooks, and Book API.
- Contributed to all phases of the SDLC — from requirements to deployment.
- Gained extensive hands-on experience in full-stack development and API integration.

Dec 2025 - Present

Software Developer 2

Eiris Innovation India Pvt. Ltd

SOFTWARE DEVELOPER 2
Eiris Innovation India Pvt. Ltd. | Dec 2025 — Present
Develop and enhance engineering software solutions designed to simplify complex electrical engineering analysis, simulation, and design workflows.

Contribute to multiple engineering products including PoleXpert, SimXpert, and the Eiris Platform.
Work closely with engineering/domain experts to understand technical requirements and translate them into scalable software functionality.

PoleXpert — Electrical Pole Structural Analysis
Developed and enhanced application features supporting the structural analysis of electrical poles.

Implemented software functionality to support engineering calculations and analysis workflows.
Improved usability and efficiency of engineering workflows for structural analysis.

SimXpert — Electrical Power System Simulation
Contributed to an electrical engineering simulation engine supporting various power-system studies.
Worked on capabilities including Power Flow Analysis, Short-Circuit Analysis, Motor Starting Analysis, and Single-Line Diagram (SLD) configuration.
Contributed to electrical system modeling, configuration, simulation workflows, and related engineering functionality.

Translated electrical engineering requirements into software features and validated functionality against engineering use cases.

Eiris Platform

Contributed to platform-level features supporting scalable engineering applications.

Worked on application integration and reusable functionality for engineering software products.

Participated in debugging, testing, code improvements, and continuous product enhancement.

Projects

48 Months

OTG — On-The-Go Transportation Platform

Tech Stack: NodeJs, React.js, PostgreSQL, HTML, CSS

Built a complete multi-provider ride-booking system with Uber/Lyft integration, scheduling, and invoicing modules.

17 Months

Custom ERP System

Tech Stack: NodeJs, React.js, MySQL, HTML, CSS

Developed modules for Purchase, Sales, Inventory, and HR, improving operational visibility and automation.

17 Months

Task Management System with Slack Integration

Tech Stack: NodeJs, MySQL, Slack API, HTML, CSS

Designed a Jira-like task tracking system with real-time team notifications and reporting dashboard.

3 Months

SimXpert

SimXpert — Electrical Power System Simulation

Worked on SimXpert, an electrical engineering simulation platform designed to perform various power system analysis and studies.

Contributed to simulation capabilities including:

Power Flow Analysis

Short-Circuit Analysis

Motor Starting Analysis

Single-Line Diagram (SLD) configuration

Electrical system modeling and configuration

Other electrical engineering calculations and simulations

Worked on developing and enhancing software features used by electrical engineers for analyzing and validating power systems.

Participated in understanding electrical engineering requirements and converting them into reliable software functionality.

CORE COMPETENCIES

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap
- **Backend:** NodeJs, ExpressJs, RESTful API Development
- **Database:** MySQL, PostgreSQL
- **Version Control / DevOps:** Git, CI/CD
- **Other Skills:** API Integration (Google Maps, Uber/Lyft, Slack), Node.js, Agile/Scrum Methodologies

ADDITIONAL INFORMATION

Open to: Full Stack / Node.js Backend Developer Roles

Availability: 1 Month Notice Period
